

The Philips UV-C sanitizer box

AFTER THE UV-C DESK LAMP, PHILIPS LAUNCHES THE SANITIZER BOX IN QATAR

After the notable launch of the UV-C desk lamp in Qatar in October 2020, Philips is expanding its proposal with the sanitizer box with a launch in December 2020. The disinfection system of the sanitizer box still works with the much proven and efficient UV technology, to disinfect objects from harmful germs (bacteria, virus, dangerous pathogens) including the inactivation of SARS-CoV-2, the virus causing COVID-19, by breaking down the DNA of micro-organisms. You can quickly disinfect 99% germs from the surfaces of objects, from 2 minutes, for a small object such as a smartphone, to 8 minutes, for a large object such as a laptop.

The range of items that can be accurately disinfected does not limit itself to electronics, but also include a wide variety of everyday objects like fruits & vegetables, packaged food packets, keys, wallets, handbags, baby bottles, toys, or even currency notes. It remains all safe to use, with special glass door which contains the UV radiations inside the chamber, and has a auto cut-off feature of UV radiations in case the glass door is opened during the sanitization process. No need for harsh disinfectant or sanitizer with chemicals anymore. The UV-C sanitizer box will soon be exclusively available at Monoprix in Qatar.

NEW CERTIFICATIONS FOR THE TECHNO Q TEAM

Congratulation to newly certified employees :

- Chanpreet Singh Walia for getting the Project Management Professional Certification (PMP)
- Mohammed Ali C Latif for receiving the Routing and Switching Huawei Certification
- Mohammed Razvi for achieving the QCDD (Qatar Civil Defense Department) Engineer Certificate Exam

QATAR NATIONAL DAY CELEBRATION

On the 18th of December, Qatar celebrates its National Day in commemoration of its unification in 1878 and the ideals and visionary aspirations that it was founded on. Techno Q would like to honor the remarkable men and women who have participated in building the Qatari nation.

To celebrate this special day, a national parade will be held on the Corniche at 9am and will be followed with a firework in the evening at 8pm on the Corniche.

You want people to know about your professional projects and achievements! Share it through the Techno Q newsletter!
